

Recent technological advancements brought us modern tools such as GPS that enabled the ride sharing and food ordering/delivery economy (Uber, Lyft and Fodora, Uber eats etc) and life is unthinkable without it. Today we also talk about AI driven cars and flying to Mars in Elon's BFR (Big Falcon Rocket...). But there is one technology that will change forever the way we do banking.

To realize the magnitude of the change that is coming you have to think how the "email" technology changed forever the traditional way of sending letters by what we call today "snail mail". The magic word is "Blockchain technology", and cryptocurrencies are part of the possibilities that Blockchain technology offer us and is one of the most adopted trend related to investment in the last years.

The crypto investors are continuously looking for the new "Bitcoin", the new "Verge", the new "Eos" ... looking for a project where they can invest and get in return exponential earnings over long periods of time. The search is going on for a new concept, a new idea or a platform that has a global scope approach and will be in continuous expansion. They are looking for companies that will exceed the limits and be capable to generate a mass adoption and profits. They search for projects that have a clear vision on how to precisely reach their objectives and generate value when compared to the rest of the existing crypto projects.

If you are a crypto investor or you represent a company that is looking to invest in crypto we have a message: YOUR SEARCH IS OVER! We are proud to introduce you The Oracol Xor Platform, a platform that has an all-encompassing strategy to create the necessary infrastructure capable of Global reach. Appealing to the general public the company will reach even into areas with low or no internet or data connections, Oracol Xor will build around those 3 elements as explained in the White Paper:

- Generate Mass adoption at grass roots level
- Launch its own Oracol Xor Social Network and News App monetized by Oracol Xor cryptocurrency.
- Enter mobile payments market using its own proprietary phone browser technology based on voice to data for use in remote areas where 3 billion people still do not have data on their phone. (yes ..is not a typo..3+ billion people and counting).

We invite you to get all the details by reading our White Paper before making a decision. Please join us on our Telegram Channel <https://t.me/OracolXor2point0> or visit our main website Oracol.org for more info. We hope to hear from you soon!
